Skills for a secure future

Certified Postman Testing Professional

Postman is a popular tool for API testing. It allows developers to test and document APIs by making requests and analyzing responses. With Postman, you can create and organize API requests, set up variables and environments, write and run test scripts, and view and share documentation. It also provides features like a built-in proxy, response history, and the ability to import and export data. Postman can be used for functional testing, load testing, and performance testing. It's available as a chrome app and also has native apps for Windows, Mac and Linux.

Please note that the course doesn't have hard copy book material.

Why should one take Certificate in API Testing with Postman?

API testing with Postman is the hottest software testing approach as it has gained widespread usage due to many benefits which Postman provides, as

- **Ease of use:** Postman has a user-friendly interface that makes it easy for testing professionals to create, organize, and execute API requests.
- **Comprehensive testing capabilities:** Postman allows for functional testing, load testing, and performance testing, providing a wide range of testing options for professionals.
- **Automation:** Postman provides the ability to write test scripts and automate the testing process, which can save time and increase efficiency.
- **Collaboration:** Postman allows for sharing and collaboration on API testing projects, making it easier to work with development teams.
- **Widely used:** Postman is a widely used tool in the industry, so learning it can be beneficial for testing professionals to be familiar with industry standards.
- **Integrations:** Postman also provides integrations with various other tools and systems like Jenkins, JIRA, and Slack which makes it even more easier to integrate with other testing and development tools.

Vskills Certificate in provides a hands-on approach to understand the nuances of Postman for API testing as well as understand Postman to design, build, and manage test cases for API testing.

The certification attests to your understanding and applying skills and knowledge in and helps you to stand out amongst your peers to help in gaining better career prospects.

The certification covers

- Setting HTTP Requests
