Certified Web Developer

Certified Web Developer

Web development is the process of creating and maintaining websites and web applications. It encompasses a range of tasks and skills involved in building and managing websites, from designing the user interface to developing the functionality and ensuring the site works effectively.

Why should one take this certification?

This certification course is a complete package if you want to dive into the word of web development. In this course, you will gain hands-on experience, building real-world projects using HTML, CSS, jQuery, Bootstrap, and more. You will start with the fundamentals of HTML, learning how to structure web content and create engaging layouts. Dive into CSS, where you will master the art of styling and positioning elements, as well as responsive design to ensure seamless adaptability across different devices.

The JavaScript section will take you deeper into interactivity and dynamic web elements, exploring event handling, DOM manipulation, and AJAX for smoother user experiences. You will harness the power of jQuery, a popular JavaScript library, to simplify complex tasks and add rich interactions to your webpages.

Learn & Study

- HTML5 & CSS3
- JavaScript
- jQuery
- Bootstrap
- PHP, Python
